ICE Series - A New Generation of Aluminum Chassis

Cubitek introduces the next step of aluminum chassis innovation — Advanced extrusion aluminum chassis manufactured using digital bending technology.

Solid

Expertly crafted with extrusion aluminum, ICE Series has the lightness of aluminum with the durability and strength of steel.

Quiet

Thicker materials mean less vibration. Capitalizing on the strength of the extrusion aluminum build and anti-vibration design of the side panels, the ICE Series eliminates vibration-induced-noise with its solid form.

Cool

Dissipating heat faster than steel built chassis, the ICE Series extrusion aluminum construction keeps your system cool. Additionally, the well-placed fans and efficient interior layout ensures optimal system temperatures.

Neat

Looking sleek and professional thanks to its brushed extrusion aluminum build, the Ice Series keeps the interior neat and organized with its easy cable management.
